

ModUp.net - FAQ - Frequently Asked Questions

This document aims to answer all the important questions regarding Modafinil..

Do you sell brand modafinil or generic modafinil?

We only supply the generic modafinil 'Modvigil'

What is generic modafinil?

Brand name medication are developed by a pharmaceutical company at great cost and is therefore priced accordingly to ensure profitability; costs include research & development, advertising and other expenses. After the patent given to the pharmaceutical company expires, other companies can begin manufacturing the same medication, however, they do not have to cover the vast development costs as does the pharmaceutical company which originally developed the medication.

For this reason generic medications have lower prices then the brand name versions.

Does generic modafinil take longer to work?

Generic drugs do not take longer to work in the body. Generic drugs are required to deliver the same amount of active ingredient, in the same amount of time as brand name drugs.

What is the package like?

The pills come in one or more blister packs containing 10 pills each. All orders under 150 pills are shipped in one package. Large orders can be split in 2 packs and come in 2 separate envelopes. The second part of a large order is dispatched in 3 days after the initial one.

Where is the modafinil manufactured?

The tablets are produced by HAB Pharmaceuticals & Research Ltd. (HAB) is a company based in India engaged in the manufacture of pharmaceutical formulations like tablets, capsules and ointments. The company has two manufacturing units in Mumbai and Dehradun. The company's state of the art manufacturing facilities comply with cGMP, WHO specifications. They maintain strict standards of humidity, temperature and partial control. Additionally, the company has a strong research and development capabilities to deliver high quality products. In 2004 HAB got ISO 9001 certification.

Is the modafinil spurious / falsely-labelled/ falsified or counterfeit (SFFC)?

We understand that counterfeit and substandard medication are a serious problem, even affecting over the counter medication found in UK pharmacies. We source the highest quality modafinil, direct from the official distributors therefore reducing the chance for the introduction of counterfeit medicines. If you have any concerns over the product you have received please contact us.

What is the usual dosage?

Usual Adult Dose for Narcolepsy: 200 mg orally daily in the morning
Usual Adult Dose for Obstructive Sleep Apnea/Hypopnea Syndrome: 200 mg orally daily in the morning
Usual Adult Dose for Shift Work Sleep Disorder: 200 mg orally daily one hour prior to the start of the work shift

What are the side effects?

Very common - More than 1 in 10 people who take Modafinil: headaches

Common - More than 1 in 100 people who take Modafinil: anxiety or worsening of anxiety, blurred vision, abnormal laboratory test results, chest pain, confusion, constipation, depression, diarrhoea, difficulty sleeping, dry mouth, faster heart rate, feeling dizzy, feeling nervous, indigestion, loss of appetite, nausea, palpitations, paraesthesiae, sleepiness, stomach pain, unusual thoughts, vasodilatation, weakness

Uncommon - More than 1 in 1000 people who take Modafinil: abnormal muscle movements or problems, controlling muscle movement, acne, allergic reactions, appetite gain, asthma, back pain, behavioural changes ? you should seek medical advice if you develop feelings of hostility or aggressiveness, blood problems, brain or central nervous system problems, breathing difficulties, changes in emotions, changes in personality, changes to weight, coordination problems or cough.

Does modafinil interact with other drugs?

Like all drugs modafinil interacts with other drugs, this is why we highly recommend checking anything you are taking with:

www.drugs.com/drug_interactions.html

Who shouldn't take modafinil?

Anyone taking other medication, including homeopathic and herbal ones, is well advised to seek medical advice first. Modafinil is not recommended for those over 65 or younger than 12 years of age. However, being a drug that works on the hypothalamus portion of the brain; anyone who suffers from a history of liver, kidney problems, heart problems, hypertension, chest pains, long-term anxiety, depression, psychosis, delusions, mania or even hearing sounds that are not really there - should seek medical advice before taking Modafinil.

What do women need to know about modafinil?

Women who are trying for a baby, or are already pregnant or are currently breast-feeding should not take modafinil.

Modafinil can stop/reduce the effectiveness of hormonal/chemical contraceptive (pills, implants, patches and even IUDs.)

Is modafinil legal?

It is illegal to buy prescription-only drugs without a prescription or consultation in the UK, whether on or offline. This law currently does not apply to websites based abroad as long as you're buying for personal use. The same rule applies if you were to bring them through airport customs here.

Legal Categories:

POM - Prescription Only Medicine

Import of medicines:

In most situations, UK medicines legislation does not impose restrictions on the import of medicines for personal use. However, for the purposes of team preparations leading up to and during the Olympic and Paralympic Games, the UK Medicines and Healthcare products Regulatory Agency (MHRA) is implementing a reasonable restriction on the import of medicines for personal use. The quantity of prescription-only medicines (POM) and pharmacy (P) non-controlled medicines that may be imported into and/or exported out of the UK will be restricted to a quantity that is equal to or less than three months supply. The UK allows individuals to import medicinal products (except controlled drugs) for personal or family use (Medicines Act, Section 13) without needing authorisation or a licence. Controlled drugs are listed in the Misuse of Drugs Act 1971 (as amended) and includes some prescription drugs. However, not all prescription drugs are on the controlled drugs list. Citizens in the UK, however, are not restricted from importing drugs (for personal use), except where a drug is on the controlled drugs list.

Do you ship to my country?

Unfortunately we do not ship to:

Belgium,

Canada,

Croatia,

Czech Republic,

Denmark,

Finland,

Germany,

Ireland,

Lithuania,

Netherlands,

New Zealand,

Norway,

Poland,

Portugal,

Romania,

Saudi Arabia,

Sweden,

Switzerland,

UAE.

Although we may be able to arrange an alternative delivery method to these countries.

Alternative shipping methods?

At least half of all orders shipped to countries in the "Do not ship" list get seized and we can no longer continue to afford the constant refunds requested by customers when their orders get seized. So we've had to stop sending directly to these countries. We ship directly from India and this may be the reason why it gets stopped at customs as it may be seen as a suspicious country. But we still want to help you out, so we suggest you get your order sent to a mail forwarder : (for example skypax.com). We'll send the order to them and they'll forward it onto your country where it is more likely to be accepted.

Please keep in mind that if you ship to one of the countries listed on our home page directly we will not provide insurance (i.e a free reshipment or refund if something goes wrong) unless you use a reship.

How to use a mail forwarder?

To use a reship simple sign up for a reship address, and then submit an order using your new address.

Payment and Delivery

How can I pay with PayPal?

Payments by Paypal are done only by request, if you wish to pay by PayPal you will need to contact us after you have placed your order with your order ID requesting payment by PayPal.

When sending the payment please use your order ID as the product name, and forward us a confirmation.

Using Bitcoin

We have dedicated several blog posts to the use of bitcoin: <https://modup.net/blog/buy-modafinil-with-bitcoin/>

Voucher codes and discounts?

The only currently active voucher code is "Limitless" which will get you 10 free tablets with your order.

We also provide a 33% discount for those customers that choose to pay by Bitcoin.

Free Samples?

I am afraid that it this time we are providing any free samples, but look out for our next free give away.

My order status?

You will receive an automated email at each stage of processing your order.

First Email: Once you create your order you will get a confirmation/invoice email.

Second Email: This email will inform you that your payment has been processed, and what to expect next.

Third Email: The final email will contain your tracking number, and links to help you track it.

Please remember to check your spam and junk folders.

How to track your package?

It is best to use an Indian Postal Tracking site, until your packages arrives in the destination country, so you should be using:

<http://www.indiapost.gov.in/tracking.aspx>

<http://ipsweb.ptcmysore.gov.in/ipswebtracking/>

<http://www.track-trace.com/post>

Once the package arrives in your country please use your local postal company's tracking site.

For example the UK customers would use: <http://www.parcelforce.com/track-trace>

Tracking not updating?

Sometimes tracking numbers can lag by a few days, or simply not update at all, this is a problem with the postal companies and beyond our control.

Once you have a tracking number you can rest assured your package is on its way.

Examples of packages arriving with no tracking updates:

http://www.reddit.com/r/modup/comments/1xtfb/my_small_review_of_modupnet/

http://www.reddit.com/r/afinil/comments/1y47k3/could_modup_be_any_better/

Reship or Refund Policy

We offer a full refund or reship policy if your package does not arrive for any reason, providing you have not shipped directly to a country on the "Do not ship" list.

How to create a reship order

To create a reship order, simply complete the order process, but skip the payment section. Then simply send us your new order ID so we can get it dispatched.

(This is generally done once a member of staff approves a reship.)

Delivery Time?

Delivery by Rush (EMS) takes 2-5 working days and Standard Airmail takes 12-21 working days (after the day of posting), depending on the country of destination and customs procedures. Delivery times may vary for some destinations. Public holidays, Saturdays and Sundays are considered non working days.

Modifications to order information?

If you make a mistake with your original order, please create a new order and send us both your old and new order ID with the email subject as "Modify Order".

Custom packaging?

I am afraid we can not customize any orders, you will need to contact a rehip for this.

Legality

Buying modafinil online without a prescription

It's technically illegal to buy without a prescription in most countries. Legal risks beyond the possibility of seizure by customs appears to be low.

Is modafinil legal? UK

It is illegal to buy prescription-only drugs without a prescription or consultation in the UK, whether on or offline. This law currently does not apply to websites based abroad as long as you're buying for personal use. The same rule applies if you were to bring them through airport customs here. Legal Categories: POM - Prescription Only Medicine Import of medicines: In most situations, UK medicines legislation does not impose restrictions on the import of medicines for personal use. The quantity of prescription-only medicines (POM) and pharmacy (P) non-controlled medicines that may be imported into and/or exported out of the UK will be restricted to a quantity that is equal to or less than three months supply. The UK allows individuals to import medicinal products (except controlled drugs) for personal or family use (Medicines Act, Section 13) without needing authorisation or a licence. Controlled drugs are listed in the Misuse of Drugs Act 1971 (as amended) and includes some prescription drugs. However, not all prescription drugs are on the controlled drugs list. Citizens in the UK, however, are not restricted from importing drugs (for personal use), except where a drug is on the controlled drugs list.

Modafinil in Canada

Canadian customs seems to be stricter than the US. Many reliable suppliers don't offer direct shipping because of the increased probability of seizure. Using a reshipping service/mail forwarding company based in the US is another option. I have to go pick up my modafinil at the post office, should I? Signing off for modafinil packages appears to be a low risk endeavor. Discussion

Modafinil

What brand do we sell?

We provide access to Modvigil by HAB Pharmaceuticals.

Brand name medication are developed by a pharmaceutical company at great cost and is therefore priced accordingly to ensure profitability; costs include research & development, advertising and other expenses. After the patent given to the pharmaceutical company expires, other companies can begin manufacturing the same medication, however, they do not have to cover the vast development costs as does the pharmaceutical company which originally developed the medication. For this reason generic medications have lower prices than the brand name versions.

Modafinil dosage?

Usual Adult Dose for Narcolepsy: 200 mg orally daily in the morning Usual Adult Dose for Obstructive Sleep Apnea/Hypopnea Syndrome: 200 mg orally daily in the morning Usual Adult Dose for Shift Work Sleep Disorder: 200 mg orally daily one hour prior to the start of the work shift.

What do women need to know about modafinil?

Women who are trying for a baby, or are already pregnant or are currently breast-feeding should not take modafinil. Modafinil can stop/reduce the effectiveness of hormonal/chemical contraceptive (pills, implants, patches and even IUDs.)

Who shouldn't take modafinil?

Anyone taking other medication, including homeopathic and herbal ones, is well advised to seek medical advice first. Modafinil is not recommended for those over 65 or younger than 12 years of age. However, being a drug that works on the hypothalamus portion of the brain; anyone who suffers from a history of liver, kidney problems, heart problems, hypertension, chest pains, long-term anxiety, depression, psychosis, delusions, mania or even hearing sounds that are not really there - should seek medical advice before taking Modafinil.

Do I have to take modafinil/armodafinil everyday for it to work?

No. Modafinil's effects are acute, they will kick in shortly after you take it. You can take it only on occasion or everyday. We don't recommend taking it everyday if you're not treating a disease/symptom.

Can I drink alcohol if I'm taking modafinil?

As a precaution it's probably good idea to not drink alcohol while using modafinil.
